

THE DIGITAL CONSTRUCTION DIARY

Baudoku

Intelligent construction documentation with real-time information and dynamic data utilization

© Deutsche Bahn AG/ Stefan Wildhirt

Digital building documentation

Document digitally - directly on the construction site and replace paper documentation quite simply:

- Baudoku is available for Android and iOS and as a desktop and app application for maximum flexibility.
- The offline functionality enables the recording of personnel, devices, services, defects, acceptances, special features and tickets without an internet connection.
- Integrated defect management enables efficient administration and tracking for smooth processing.
- Research done quickly: Baudoku offers detailed filter and report options with PDF and Excel export options.
- Instructions and training videos make it easy for all users to familiarize themselves with the system.
- The application is SharePoint-based to ensure seamless integration and collaboration.

Who benefits from the Baudoku?

Building supervisor

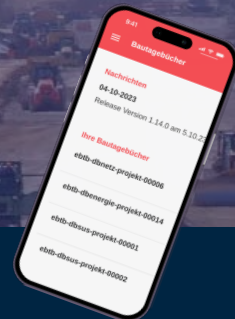

Project manager

Managing director

Experience effortless documentation thanks to our predefined categories for personnel, equipment, services, defects, acceptances and special features.

Our structured approach enables effective management.

Our added value

- 1 Efficient standardization
- 2 Fast data usage
- 3 Better communication
- 4 Process optimization and transparency
- 5 Time and cost savings
- 6 Digital transformation
