Whether you require batteries repaired, overhauled or replaced, Capitol are trusted and relied upon by a wide range of UK rail industry companies, who have come to know that we deliver on our promises to provide exacting standards of product, service, ongoing technical support and commitment in all aspects of our business dealings.

An independent manufacturer with enough strength and flexibility to be able to support mainline customers requirements through stock availability and technical experience, we have consistently delivered on a wide variety of projects ranging from single battery orders, to fleet change out programmes set against customer schedules and agreed service levels.

Our battery systems guarantee reliability for the following applications:

- **City traffic**
Suburban railway and underground trains
As traction, lighting and auxiliary power supply.
- **Regional traffic**
Railway passenger carriages and powercars
As diesel starting and auxiliary batteries.
- **Intercity traffic**
Railcars with diesel engines
Electric railcars as auxiliary power
Modern long distance trains both passenger and freight
As diesel starting, auxiliary power and lighting.

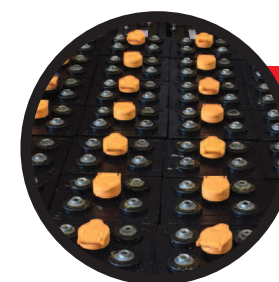

All batteries are designed as Low Maintenance and offer a number of safety features as standard such as, fully insulated connections for both ease of repair and to comply with all current recognised BS and EN regulations.
