COMPONENTS

FOR AN EFFICIENT AND
SAFE RAIL NETWORK

IN FAVOUR OF MOSDORFER RAIL'S COMPONENTS

HIGH-QUALITY FOR RAILWAY SYSTEMS

QUALITY

Our high-quality components are integral to the efficiency and safety of our railway systems.

The portfolio is a variety of lugs, compression lugs, joints, connectors and grounding systems.

There are a variety of different wire joints within our portfolio these are a variety of compression joints and contact wire joint.

Contact wire joints supply an electrical and mechanical connection through the contact wire as well as connecting the grooved overhead contact wires to full tension.

Compression joints are produced for a variety of different applications which include, Bronze and Copper wires, Copper wires and aluminium and steel cables.

Benefits of our components

- Low and medium voltage solutions for bare and aerial bundle networks
- Compression and bolted connections to suit all conductor sizes from 4–630 mm
- Overhead and underground application
- Copper, Aluminium and Bimetallix
- Wide range suited to NF-C and DIN standards
- Manual and Battery compression tools
- Compression dies and adaptors for all systems.

Bimetallic compression lugs

- Bare and tin plated 16–630 mm²
- Overhead and underground networks
- UNE 211024-2
- DIN 46329
- Single and double bolted palms

Aerial bundle networks

- Pre-insulated
- Lugs and joints for LV Systems
- 16–150 mm²
- Insulation piercing connectors (IPC's)
- French systems
- 1.5–240 mm²
- Strain and suspension brackets and clamps
- Bolted with breakaway caps to ensure correct installation torque

Railways

- C & H compression connectors
- 6–240 mm²
- Copper and Aluminium
