PURE PERFORMANCE

# Understanding the big challenges in maintenance

Prepare to transform your rail remanufacturing process with our newest product: DST-GEL/2. A gel that has been meticulously developed to accommodate oversized components, ensuring they receive the attention they deserve. The gel is simply sprayed on parts full of oil, grease, tar, rust and brake dust, left on for minutes and finally rinsed off. Discover the convenience and effectiveness of this innovative pink product as you streamline your remanufacturing operations with a non-hazardous, practical, and cost-effective gel.

#### Technical Specifications:

- Ready-to-use
- Low alkaline, pH 9.8
- Working temperature from 5°C
- Works on cast iron, steel, and stainless steel.
- Non-labelled. Yet as powerful as brake cleaner.
- Spray on. To be used in a large application system or a small spray bottle.
- No quick evaporation, can be left on for longer unlike brake cleaner.

#### Product Features

- *Exceptional cleaning performance:*  
Highly effective on sticky passivation oils, burnt-on oils and grease, tar, brake dust, small metal parts from wheels and tracks.
- *No labelling:*  
Non-hazardous, providing a much safer work environment.
- *Viscosity:*  
A gel that sticks to vertical surfaces, providing thorough coverage and ensuring maximum effectiveness.
- *Visual clarity:*  
Track progress effortlessly with this pink gel, ensuring thorough cleaning while minimizing product consumption.
