

FLEXFAB HIGH PERFORMANCE DUCTING, HOSE, AND CONNECTORS FOR THE LOCOMOTIVE INDUSTRY

Flexfab's engineered, flexible connectors are designed with technical fabrics and elastomers to provide flexibility and strength in your extreme engine environments. Silicone and fluorocarbon elastomers provide excellent chemical resistance and long life. Technical fabrics such as meta and para aramids provide strength and flex-life at extreme temperatures. Combined, these materials make the perfect solution for difficult system joints that experience relative movement.

- Large diameter turbo bellows with assembled hardware
- Air inlet bellows and sleeves
- Coalescer hoses and connectors, silicone and fluorocarbon
- Traction motor cooling ducts
- Engine coolant hoses and assemblies, SAEJ20R1 Class A Compliant
- EGR bellows and hoses
- Operating Temperatures of -54°C to +260°C
- Can design for positive and negative airflow
- Compliant with NFPA130, EN45545

AS9100 / ISO9001 / IATF16949 / ISO14001 REGISTERED
