

Bespoke Design

Matching your needs

*Excelling in onboard passenger
service delivery!*

Korita Aviation is renowned for manufacturing high-quality galley insert equipment that delivers exceptional reliability throughout the operational catering process.

Our approach is one of partnership, by carefully listening to our rail industry customers, we determine their requirements and deliver a bespoke design.

With more and more people opting to utilise different methods of transport, we have been delighted to support key influential rail operators with the manufacture of galley equipment that enhances onboard passenger service delivery.

'Rail catering equipment with unbeatable longevity and ease of use.'

A statement synonymous with our rail containers utilised by rail operators worldwide!

Expertise and know-how is essential. We have extensive experience in the railway industry, with rolling stock suppliers being part of our global customer base.

Rail carriage interiors and passenger service provision is set to have increased importance in the coming years. As rail industry professionals, you know that Korita Aviation can deliver the advice and support you need both now and in the future.

Determine an optimum design together with us!

With our capabilities to deliver a bespoke design and the possibility to select from our existing standard rail catering equipment range, we are confident that we can support and add value to your company by manufacturing high-quality rail catering equipment to meet operational requirements.
