U-LIFT

Growing in a Wider Market

Accessibility when travelling made possible

U-Lift in Backaryd, Ronneby municipality, continues to expand and grow with both existing and new customers on the world market. Recently, additional agreements were reached with world-leading train manufacturers and more business agreements are ready for contract writing.

U-Lift in Backaryd, Sweden with offices, a warehouse and a production facility, is a local manufacturer operating in the global market. With quality-assured lifts, ramps and air suspensions, primarily for rail-bound vehicles for passenger transport, the company has

established itself as a stable and leading supplier in the industry, nationally and internationally. Since its launch in 1957, its manufacturing activities have gradually developed and today the focus is on the production of lifts, ramps and air suspensions, mainly for trains.

“We are in a strong growth phase. With the latest orders, we have taken great steps towards our growth strategy and have been able to open the doors to a wider market,” says Stephane Thomsen, Sales and Marketing Manager, U-Lift.

Specialised Manufacturing

U-Lift is a leader in the industry, with exports primarily

“We are in a strong growth phase. With the latest orders, we have taken great steps towards our growth strategy and have been able to open the doors to a wider market.”

Stephane Thomsen, Sales and Marketing Manager, U-Lift

to European countries but also globally with countries as far as Brazil. The company has specialised its manufacturing, and will continue to specialise in trains and rail-bound vehicles.

“The situation in the outside world obviously affected our production. Our business with Russia and Belarus is fully discontinued in accordance with the restrictions. At the same time, we have opened up co-operation with new countries, including Thailand and China. We are, and will continue to be, ‘best in class’ for rail-bound vehicles,” says Stephane Thomsen.

The trend in the market shows that more and more countries are prioritising higher accessibility when it comes to passenger transport. Higher demands from clients, manufacturers and users mean adaptations for U-Lift as a supplier as well.

“Our business model is based on us being able to adapt the products to the current structure but also being able to adjust and meet the requirement specifications

U-Lift in Backaryd have faith in the future and have recruited several new employees. From the left: Lamine Sternkult, new Sales and Project Manager; Stephane Thomsen, Sales and Marketing Manager; and Mattias Olsson, CEO and Co-owner. In the middle: Velia Ekström, new Quality Manager at the company

The company has specialised its manufacturing in trains and rail-bound vehicles

in new infrastructures. Our very largest products are still wheelchair lifts such as the INV-300 and UPL-300, they are product platforms that can be adapted to new requirement specifications in each unique project,” says Stephane Thomsen.

New Business Partners

In the latest investments, expanded production areas

and warehouse space are accommodated in parallel with new recruitment for the facility in Backaryd.

“Our goal is to grow 15 percent a year, which we have exceeded. By strengthening the flow through expanded surfaces, we have been able to increase the production rate in accordance with our target. The fact that we continue to strengthen competence with new employees means that we can connect with new partners and business partners. There is a strong belief in the future at U-Lift,” says Stephane Thomsen.
