

# Intelligent Railways

## For a Sustainable Future

We are digitizing the world of railways for tomorrow. We supply software and technology from a single source and operate one of the world's largest IoT platforms for condition monitoring and predictive maintenance in the rail sector.

**DIANA**®

Condition Monitoring  
and Diagnostics

Get to know DIANA®, our all-round solution for predictive maintenance:

### *One stop shop*

We supply everything from a single source (software, hardware, installation) for an integrated solution for monitoring railroad systems.

### *Our mission*

Railways must become more modern, intelligent and sustainable in order to counteract climate change and meet the mobility needs of tomorrow.

### *Our know-how*

We combine rail expertise with software engineering and support the process of digital transformation for optimized railroad operations and maintenance.
