RAIL MOVEMENT PLANNER™
IS A REAL-TIME PLANNING TOOL

Using **Artificial Intelligence** to provide optimized traffic capacity and performance.

Proven and tested around the world by both passenger and freight operators, including Rio Tinto in Australia as well as Ferrosur Roca from Argentina, ArcelorMittal in Canada, and from Chile – Empresa de los Ferrocarrilles del Estado.

RAIL MOVEMENT PLANNER™
SUCCESSFULLY OPERATES IN
FULLY AUTOMATED RAILWAYS

Producing efficiencies not achievable with a room full of planners and train controllers.

For any situation, any framework, any problem, **Rail Movement Planner™ delivers the best possible result,** even for radically distinct or unique operations. It's as if you have a room full of train planners assisting Train Control but in real time.
