

Kiel Americas

Seating Refurbishment Services for Mass Transit

Kiel Americas, as a part of the Kiel Group, has been providing seating solutions for the North American mass transportation industry since 2009.

Besides the design and production of new seating systems for local, regional and intercity rail, we also offer a wide array of services for repair, refurbishment and the replacement of parts to extend the life of

your seats, ensuring that your passengers remain as comfortable as possible throughout the life of your vehicle.

Safety is our top priority. We meticulously inspect each component for any structural damage or defect. From loose bolts to weakened supports, we repair it all. Our refurbishment process ensures that every seat meets the highest safety standards, providing peace of mind for both you and your passengers.

Intra

We also know that a fresh, clean look can make all the difference in passenger satisfaction. When reupholstering, we offer a wide range of fabric choices and colours to match your car's interior, giving it a fresh, modern look.

An important part of our design philosophy at Kiel Americas is modular, recyclable construction systems. Our seats are composed with a modularity that allows for the easy replacement of specific parts as needed, without the need to scrap the entire seat and purchase a new one. Not only does this translate to substantial financial savings for the operator or transit authority, but it also means that our environmental impact is significantly reduced. Renovating a seat after 10 years of use is often as simple as replacing the fabric and foam, which allows most of the components to remain in use without leading to any unnecessary waste.

We stand by the quality of our work. Our team of skilled technicians brings years of experience to ensure every seat is refurbished to the highest standards. We guarantee you'll be satisfied with the results.

Ready to transform your train seating? Contact Kiel Americas today to learn more about our repair and refurbishment services. Let's work together to create a comfortable, safe and pleasing environment for your passengers. It's up to you.®
