Solutions

### **Virtek Embraer Partnership (Paint-Masking Application)**

"The time savings has been remarkable -- our technicians in the paint booth can now lay out an aircraft in four hours with two technicians, when it used to take 2-3 shifts when working with Mylar templates. Also, the amount of rework has almost been eliminated."

### **RETURN ON INVESTMENT**

**ON 27 AIRCRAFT IN A 5 TO 6 MONTH RANGE**

### **Firefly & Virtek Partnership (Automated Layup Application)**

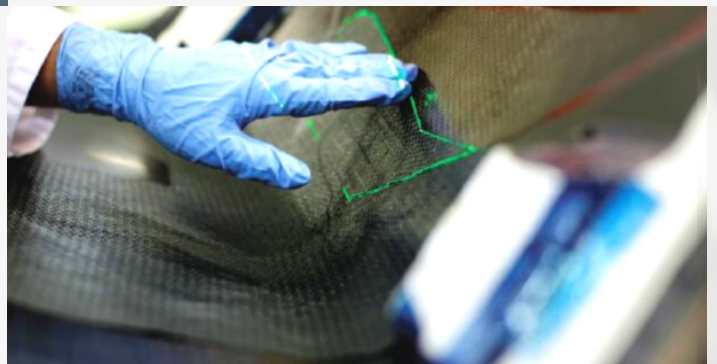

The integration of Virtek's innovative IRIS 3D software, paired with their Vision-driven laser system provided the total package to gain efficiencies Firefly was looking for in their layup process.
