Lobbysign**LED** *wall mounted*

standing out

Lobbysign*LED wall mounted*

The Lobbysign*LED wall mounted* system is at the forefront of visual communications, giving maximum impact to your messages, notices and important information. Its contemporary design and ease of use are also essential qualities that make the LobbysignLED an invaluable tool for businesses and organisations to communicate and inform.

Powerful Communicator

The LobbysignLED is so eye-catching that it is impossible to ignore, whether it is showing a single message or running simple sequences of information. The "Portrait" style format of the display, by its nature, draws people's attention and makes reading appealing to viewers.

The LED panel offers high luminosity and clear lettering, which make it the perfect medium to communicate single or multiple messages in a short time. The LobbysignLED is the focal point in foyers, reception areas, lobbies and atriums.

Whether the LobbysignLED is installed in the reception of a company, leisure centre, school, college, university, library, hospital, surgery, council office, hotel, police headquarters, station, conference or exhibition centre, it has no equal in getting across the important information or message when it really matters.

Unique Wall-hung Appearance

Its wall bracket enables the LobbysignLED to be fitted securely to any solid or supported wall. The screen can be angled or placed back against the wall, providing the optimum position to catch people's attention. Its sleek and professional design gives the best first impression in both contemporary and traditional locations.

The powder painted neutral surround and non reflective perspex provide a simple and clean background to give maximum effect to the illuminated text. Your own corporate image can be enhanced by applying a logo to the optional light box which is installed in the top of the LobbysignLED.

Easy to Operate by All Staff

The hand-held infrared keyboard makes programming easy. Pages can simply be selected to display individually, or scheduled by time and date to appear exactly when they will have the most impact - in front of your targeted audience. Maximum effect is achieved when the people, to whom you need to communicate, receive information relevant to them, thereby making our timing and scheduling software an essential programming tool.

Technology and Service

The LobbysignLED requires no regular maintenance and is highly durable and reliable thanks to the use of top grade components and rigourous testing. Technological piece of mind is ensured by Brackenbury's professional back-up team, with its quick response, expertise and unrivalled after-sales service.

General Specifications

Height	932mm
Width	680mm
Depth	105mm (in the middle)
Weight	23kg including wall bracket
Character type	Green LED (light emitting diode)
Character matrix	7 x 5
Character height	30mm
Viewing distance	Up to 25 metres
Lines on display	8
Characters on display	160
LED options	Red, white or blue LEDs
Storage of text	Up to 100 pages of 8 lines
Programmed text	Pages selected, sequenced and timed individually
Scheduling	Time and date
Operation	Infrared keyboard, PC RS232, Network
Logo (option)	Printed on film, stuck inside lightbox at top of display
Power consumption	220v AC - 200w max / 110v AC 400w max
