

Lantal Textiles Ltd. Group Portrait and Facts & Figures

GROUP PORTRAIT

Lantal Textiles is a leader in the design, production, and distribution of textiles and services for the international community of operators of aircraft, railways, and buses, as well as for executive jets and superyachts. We offer our customers forward-looking counsel in the domains of style, design, and completion. The underlying objective is the highest level of well-being for travelers. The markets:

Aircraft

Products for the aviation industry may be custom designed or sourced from existing stock collections and include upholstery fabrics, curtains, velvets, carpets, leathers, blankets, antimacassars, and wall coverings. Each of these products meets the latest specifications of the international civil aviation industry. Over 300 airlines and all of the world's major aircraft and seat manufacturers are among our customers.

The Pneumatic Comfort System (PCS) is a Lantal innovation. The first seat cushion generation was successfully commercialized in 2005. The air-filled PCS seat cushions, replacing conventional foam-filled cushions, offer unprecedented seating and sleeping comfort. Passengers of Swiss International Air Lines have enjoyed this revolutionary technology in the business and first class sections of the carrier's long-haul fleet since 2009. More and more other well-known airlines have been adopting PCS technology since then.

Bus/Train

Premium hard-wearing velvets and flat weaves as well as carpets are Lantal's core business in the bus and train market. Our customers include bus manufacturers, tour operators and public transportation authorities.

Executive

Exquisite upholstery fabrics, premium leathers, curtain fabrics, and hand-tufted carpets highlight the luxurious staterooms of superyachts and the cabins of executive jets.
