

S3 passenger

for  **Iarnród Éireann**
Irish Rail

About Irish Rail

Iarnród Éireann, Irish Rail, operates city and commuter services in Dublin and Cork as well as intercity services throughout Ireland. Customers are at the heart of their business. Their mission is to deliver transport services that continuously meet customers' requirements and help drive Ireland's economic development.

Gerry Culligan, Commercial Director Irish Rail, commented: "Irish Rail is immediately benefiting from S3 Passenger's proven technology during the first days of operation, with improved customer experiences and record online revenue generation! S3 Passenger and Sqills have lived up to our expectations, especially their 'can do' mentality."

Working closely together with Sqills for some time, Paul O'Kelly commented: "Never lose the solutions focus that you guys at Sqills have. You combine aptitude and attitude perfectly."

Irish Rail uses all the S3 Passenger modules:
