

WE MAKE EXCEPTIONALLY ENGINEERED PRODUCTS TODAY'S INDUSTRIES DEPEND ON

For more than 50 years, Flexfab has been a leading designer and supplier of high-performance polymer-based products, including reinforced elastomeric hoses, ducts, and connectors.

Today, we are a world leader in the manufacturing and assembly of parts made from silicone and composites, and have a global reputation for superior results at every stage of design and production. That reputation has established Flexfab as the trusted supplier to the top firms in a wide range of businesses across North America, Europe, Asia, and South America.

In the transportation industry, our reputation is built on a commitment to engineering excellence and providing customized solutions for manufacturers in everything from aerospace to automotive, trucking, and of course, rail.

RELIABLE, COST-EFFICIENT IDEAS THAT HAVE RAIL MOVING IN THE RIGHT DIRECTION

For the rail industry, Flexfab's lightweight, rigid composite products are enabling a new era of reliable, cost-efficient operation. Passenger systems across the globe rely on our flexible hose, composite ducts, and other products to help reduce weight while ensuring reliable operation of HVAC units. You'll also find Flexfab connectors, coolant hoses, turbo bellows and other parts hard at work in locomotives, enhancing efficiency and reliability, mile after mile, year after year.

While we meet the exacting standards and specifications of the major aircraft, automobile, truck, military and industrial manufacturers, we also meet or exceed the toughest rail industry standards, including:

- EN 45545
- NFPA 130

We're experienced. We're trusted. We're Flexfab.

Wherever you turn today, you'll find Flexfab products driving the rail industry forward. That's because rail companies know they can count on Flexfab. Engineering trust. Around the world.™

Great products.

Engineered to the highest standards.

Our passenger rail products:

- Lightweight, rigid composite ducting for HVAC
- Flexible hose for air and drain applications
- Assemblies of composite ducts with flexible connectors and hardware

Our locomotive products:

- High performance, high temperature flexible ducting and connectors

Engineering trust. Around the world.™
