

FLEXFAB RIGID THERMOPLASTIC COMPOSITES

Flexfab delivers a wide range of reinforced thermoplastic ducting to meet virtually any application or need. Customers across a range of industries rely on us for highly complex thermoplastic ducts that integrate parts, improve installation time, and reduce weight.

Those customers know Flexfab's manufacturing process is quick and consistent. And that Flexfab's Reinforced Thermoplastic Ducting is ideal for high volume, 3-D geometries.

Flexfab can help you handle negative or positive pressure applications in a variety of conditions—simply by adjusting material plies or by reinforcing the product.

And we help you reduce part count and installation time, by integrating attachment architecture into the parts. Flexfab. Engineering trust. Around the world.

Benefits

- Weight reduction
- Integrated assemblies/part count reduction
- Installation time savings
- Negative or positive pressure capable
- Compliant with current flammability requirements:
NFPA 130, EN 45545
