

**Uniting Innovation, Engineering, Manufacturing, and Distribution**

## PowerSORB™

PowerSORB™ is a 100% organic absorbent which can be used on roads, water and any other surface. This highly efficient material, made with European Patented Technology, provides 100% absorption of Lubricants, Oils, Paints, Dyes, Fluids, and Coolants.

Within seconds PowerSORB™ is able to absorb up to four times its own weight. Made of light-weight material, this product is easy to handle and disposal is cost-effective.

## See PowerSORB™ in action!

**PowerSORB™ is available in three different forms for various applications and situations.**

(Ordering information and details - see Page 2)

- **Dry material** to apply directly on the spill to be absorbed. When used in water, PowerSORB™ stays on the surface and can be suctioned or skimmed off. The "problem" material is not transferred from the surface of the water to the bottom.
- **Pillows and Tubes** of PowerSORB™ material in an absorbent pouch to be placed directly on the spill or to surround the spill as a blockade to prevent further contamination.
- **Rail Mats** designed to fit between the tracks to absorb leaks from a locomotive during maintenance or storage. Mats have three layers: upper and middle layers made of absorption materials, and lower layer is oil resistant foil with anti-slip coating. Rail Mat is completely sealed from the ground - no leaks - and will NOT absorb rainwater from below. Resilient against cold temperatures and heat resistant up to 356°F.

### Oils & Lubricants

100% Absorption:  
Crude/heavy oil,  
hydraulic, mineral,  
and engine oil, liquid  
paraffin, lubricants,  
and petroleum

### Chemicals & Emulsions

100% Absorption:  
Alcohol, fungicides,  
polymers, organic  
solvents, turpentine

### Paints & Others

100% Absorption:  
Coatings, paints, dyes,  
break fluids, de-icing  
agents, coolants

### Fuels

100% Absorption:  
Benzine, diesel,  
kerosene,  
marine diesel

## Why PowerSORB™?

- Nontoxic to humans and the environment
- Light-weight and easy to use
- Hydrophobic - perfect for maritime use
- ONE product for all applications

100% Natural Fibers and 100% Biological

## PowerSORB™ Ordering Information

PowerRail Part #	Description	
PRD16187045	50L Bag (16.5 lbs) Absorption Capacity: 13.2 gallons	
PRD16187053	8" x 12" Pillow Absorption Capacity: ¾ gallon	
PRD16187054-750	PowerSORB™ Tube (30.5" x 6") Absorption Capacity: 2.1 gallons	
PRD16187054-1500	PowerSORB™ Tube (59" x 6") Absorption Capacity: 4.25 gallons	
PRD16187046	Safety Kit: 2L Bag of PowerSORB, an 8"x12" Pillow, and accessories	
PRD16187051	Rail Mat (4.65' x 82') Absorption Capacity: 74.25 gallons <b>NOTE: Will NOT absorb water from below</b>
