

ZPW126-31 – The new warning device for the Autoprowa® hardwired system

COST SAVINGS

- » acoustic warning signals and visual reminders in one device
- » review interval only every three years
- » reduced transport costs due to compact design
- » almost maintenance free – no charging of batteries required

SAFETY

- » Developed according to CENELEC Safety Integrity Level 4 (SIL 4)
- » Visual and Acoustical devices redundant and intrinsically safe

COMPLIANT TO EN-SPECIFICATION

- » Meets fully the requirements of the latest specifications from the international standard

EASY HANDLING

- » quick installation (one device for acoustical and visual warning)
- » low weight approx. 8 kg
- » compact design and stackable on euro pallet

HIGHEST PERCEPTIBILITY

- » 360 degrees perceptibility
- » „Ready for operation“ signaled by status-LED

OPTIMIZED AUTOPROWA® EFFECT

- » automatic adjustment of the acoustic warning between 97 and 126 dB(A)
