HISTORY

1956 Founding of SENOPLAST by Wilhelm Klepsch in Kaprun

1972 Start of production of co-extruded sheets

1977 First patent for co-extruded **senosan®** ABS/PMMA sheets for sanitary applications

1978 Relocation to Piesendorf

1984 Increase of capacity and expansion of production facilities

1992 SENOPLAST receives the ISO Quality Management Certification

1998 Founding of SENCO R&D separate company for research and development

1999 Extrusion line for production of sheets up to 3000 mm wide

2000 Founding of SENOPLAST S.A. de C.V in Querétaro, México, by Günter Klepsch to supply all customers in the NAFTA area in a quicker and more efficient way

2004 Extrusion line for production of special films

2006 Founding of SENCO (Europe) GmbH new production site under cleanroom conditions for the automotive industry

2011 Lifetime achievement award Wilhelm Klepsch was awarded the Salzburg economy prize 2011 for his corporate lifework

2013 Wilhelm Klepsch becomes Chairman of the Board and his son Günter Klepsch takes over management of SENOPLAST as CEO

2015 Senoplast receives award 'Austria's best family business' in the category federal state of Salzburg

2019 Founding of SENOPLAST New Material (Suzhou) Co. Ltd. Suzhou/Wujiang

Today, SENOPLAST is a globally active corporation with a strong commitment to its community in Piesendorf, Austria. The company employs 700 people worldwide.

2016 SENOPLAST's 60th company anniversary

A REAL SUCCESS STORY

QUALITY & INNOVATION

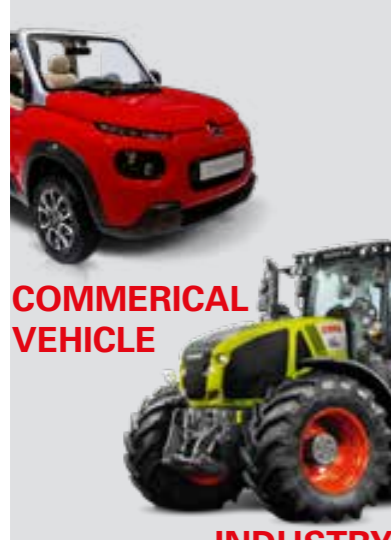

DE | Forschung und Innovation haben Senoplast zu einem der führenden Hersteller von Spezialkunststoffen gemacht. Weltweit schätzen Kunden die einzigartige Senoplast-Qualität. Sie können sicher sein, dass von der ersten bis zur letzten Platte oder Folie eine gleich hohe Qualität geliefert wird.

*The engine driving
technology leadership*

EN | Thanks to constant research and development Senoplast has become one of the leading manufacturers of high-quality specialist plastics. Customers around the world appreciate Senoplast's quality. They can be sure to receive the same high quality from the first sheet or film to the very last.

APPLICATIONS

A wide range of plastic solutions

colours and embossings

senosan® sheets and films are offered in a wide variety of different colours and embossings. According to our customers' demands the products can be supplied in smooth, matt, supermatt and high gloss surfaces.

senosan® PC sheets

Co-extruded and coloured polycarbonate multilayer sheets used for the production of thin wall hard shell low weight suitcases available in solid and metallic colours.

senosan® PC/ABS Blends

Co-extruded flame retardant sheets that fulfill stringent specifications for the railway and bus industries.

senosan® ABS + ABS/ASA

These special mono and multilayer sheets have been developed to fulfill the high demands of the market in respect of design, technology and optical appearance. They offer an optimum synthesis of required mechanical properties such as impact strength and rigidity as well as excellent surface quality.

senosan® ABS/PMMA

Co-extruded multilayer sheets with a custom made base layer of ABS, high impact ABS or ABS/PC- blend and a top layer of high gloss, matt, UV-resistant, impact modified or chemically improved PMMA, as per customers requirements. These sheets have been developed for high quality thermoformed parts for outdoor and indoor applications. Their quality set market standards.

senotop® and senosan® special films

We have developed unprecedented high gloss senotop® films for the automotive industry as a paint replacement. The quality of our highly scratch resistant senosan® furniture films has not found its equal in the furniture market up to this date. Our technical innovative force keeps us ahead and enables us to supply complying with strict specifications.

senosan® PS sheets and films

Co-extruded sheets and films made of high impact polystyrene used in different industries. The high impact films with machine gloss surface offering good rigidity are mainly used in the pharma and dairy industries, where they are highly appreciated for their extreme continuous quality level.

DE | Die Anforderungen an Kunststoffe haben sich grundlegend geändert. Kunststoff ist Teil des Designs, die Kunststoffoberfläche das Gesicht vieler Produkte.

Mit der Reinraumtechnologie kann Senoplast Oberflächen herstellen, die den Produktdesignern ganz neue Möglichkeiten bietet. Im hochkomplexen Verfahren der Coextrusion werden hochglänzende, matte und supermatte Oberflächen hergestellt, die zu 100% den Anforderungen der Kunden angepasst werden.

EN | There has been a fundamental change in what we expect plastics to do. Plastic is part of the design, the plastic surface is the face of many products.

With clean room technology, Senoplast can produce surfaces that offer product designers entirely new possibilities. Highly complex co-extrusion processes are used to produce high gloss, matt and supermatt surfaces that fit 100% with our customers' requirements.

AUTOMOTIVE & COMMERCIAL VEHICLE INDUSTRY

DE | Leichter, effektvoller, matter, glänzender. Für Innen- und Außenanwendungen. Die Anforderungen der Auto- und Nutzfahrzeugindustrie an Kunststoffe sind vielfältig und besonders hoch. Senoplast liefert für viele Premiummarken Kunststoffe, die zu anspruchsvollen, langlebigen Teilen weiterverarbeitet werden. Energiesparend, flammhemmend, für den Leichtbau geeignet – für diese Industriezweige müssen Kunststoffe über viele außergewöhnliche Eigenschaften verfügen.

EN | Lighter, more impressive, more matt, higher gloss. For interior and exterior applications. The automotive and commercial vehicle industry has a wide variety of very high requirements when it comes to plastics. Senoplast supplies plastics for a number of premium brands; these materials are then further processed into sophisticated, durable parts for interior and exterior applications. Energy-saving, flame retardant, built for lightweight constructions – these are the challenges facing these industries. Smart plastics from Senoplast are part of the solution.

DE | Wohin Ihre Reise Sie auch führt – die hochwertigen **senosan®** Kunststoffplatten von Senoplast begleiten Sie! Mit der innovativen Produktpalette deckt das Unternehmen eine große Bandbreite an Anwendungsmöglichkeiten in der Motorhome- und Caravanindustrie ab. Dabei hält Senoplast stets Kurs auf die Zukunft und entwickelt für jede individuelle Herausforderung die optimale Lösung.

EN | Wherever your journey takes you – the high quality plastic sheets of Senoplast will accompany you! With its innovative product range, the company covers a wide area of application possibilities in the motorhome and caravan industry. Senoplast is always steering towards the future and developing optimal solutions for each individual challenge.

CARAVAN INDUSTRY

TRAVEL & LEISURE

DE | Ob Fernreise oder Kurztrip – Ihr Gepäck wird gut ankommen. Aus **senosan®** gefertigte Koffer sind leicht und widerstandsfähig. Tolle Farben und Effekt-oberflächen machen jedes Gepäckstück zu etwas ganz Besonderem. Und der Dachkoffer sorgt für eine sichere Beförderung der Dinge, die sonst noch für einen gelungenen Urlaub nötig sind.

EN | Whether long-haul or short trip – your luggage will arrive safely. Cases made with **senosan®** are lightweight and resistant. Great colours and decorative surfaces make every piece of luggage something very special. And the roof box ensures a safe transport of all the other things that are necessary for a splendid holiday.

SANITARY INDUSTRY

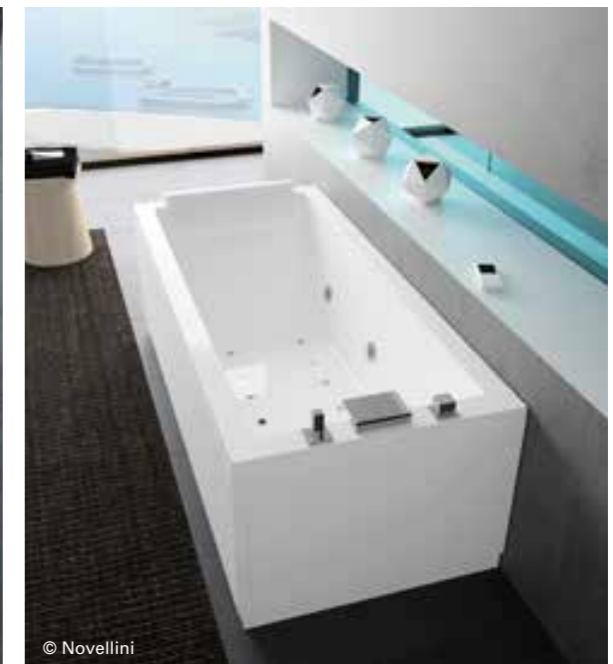

Brooke Reveal | mirolin

DE | Diese Branche hat ganz besondere Anforderungen an die Endprodukte. Hochglänzend, chemikalienbeständig, schlagfest und vieles mehr. **senosan®** Platten zum Thermoformen erfüllen diese Anforderungen und Aufgabenstellungen mühelos. Nicht umsonst steigen und stiegen die großen Hersteller auf **senosan®** als Grundmaterial um.

EN | This industry has very special requirements of its end products. High gloss, resistant to chemicals, impact resistant and much more. **senosan®** sheets for thermoforming fulfill these requirements and pass all the tests without difficulty. It is not just a coincidence that the major manufacturers have switched and are switching over to **senosan®** as their basic material.

EN | The surface is the face of any furniture. And furniture design likes to play with different surfaces and structures. Whether high-gloss or supermatt – Senoplast supplies the world's major furniture manufacturers. These furniture films are very popular thanks to new developments, such as anti-fingerprint and high chemical resistance surfaces. And the fact that they can be produced in almost all the colours of the rainbow delights designers.

FURNITURE INDUSTRY

DE | Die Oberfläche ist das Gesicht der Möbel. Und Möbeldesign spielt gern mit verschiedenen Oberflächen und Strukturen. Ob hochglänzend oder supermatt – Senoplast liefert für die großen Möbelhersteller der Welt. Neue Entwicklungen wie Anti-Fingerprint und besonders chemikalienresistente Oberflächen machen diese Möbelfolien so begehrt. Und dass sie in nahezu allen Farben dieser Welt hergestellt werden können, freut die Designer.

REFRI GERATOR INDUSTRY

DE | Wenn ein Kühlschrank ein besonders cooles Design bekommt, dann ist Senoplast gefragt. Stoß- und kratzfeste Oberflächen, viele Möglichkeiten in Form und Farbe. Senoplast macht mehr aus Ihrem Kühlschrank.

EN | If a refrigerator is given a particularly cool look, then the designers come to Senoplast. Impact- and scratch-resistant surfaces, a wide range of possibilities in shape and colour. Senoplast makes more out of your refrigerator.

RESPONSIBILITY

DE | Als Familienunternehmen steht Senoplast zu seiner Verantwortung gegenüber der Gesellschaft, der Natur, der Umwelt und den Menschen, die hier arbeiten. Wir sehen unsere Mitarbeiter als Partner.

Senoplast hat den grünen Geist als Leitmotiv gewählt. Er steht für unser Denken, wie die Welt von morgen aussehen soll und wie wir mit den gegebenen Ressourcen umgehen. Senoplast sieht sich als Vorreiter einer umweltgerechten industriellen Produktionsstätte und wurde dafür vielfach ausgezeichnet.

EN | As a family business, Senoplast stands by its responsibility towards society, nature, the environment and the people who work here. We see our employees as partners.

Senoplast has chosen the Green Spirit as its motif. He stands for the way we think, our idea of what tomorrow's world should look like, and how we use the resources given to us. Senoplast sees itself as a pioneer of environmentally friendly industrial production methods and has received many awards for this.
