INFIT[®] Cladding

Ready-to-assemble, lightweight,
customized interior solutions

Overview

INFIT® Cladding offers a comprehensive product range of lightweight structural panel solutions that make for spacious, modern-looking and comfortable cabins. As it's modular in design, the **INFIT® Cladding** system is not only easy to fix or even replace, it's also perfect for routing or covering any of a vehicle's other installations.

In developing **INFIT® Cladding**, we wanted to create suitable and complete system solutions that are made ready to be installed directly into a car body. This means a significant reduction in vehicle assembly time at the production site, as the number of operations to be carried out is also lowered. We approach every **INFIT® Cladding** project on a case-by-case basis.

INFIT® Cladding offers high strength and stiffness-to-weight ratio, durability and thermal insulation, as well as resistance to fire, corrosion and wear. Made using a combination of high-quality materials guaranteeing outstanding performance, **INFIT® Cladding** provides a solution to meet demanding industry standards and expectations.

Our innovative materials

ALUCORE®

ALUCOBOND®

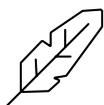

HYLITE®

INFIT® Cladding system is not only easy to fix or even replace, it's also perfect for routing or covering any of a vehicle's other installations.

Function overview

Lightweight construction

Cost saving

Time saving

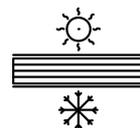

Easy installation

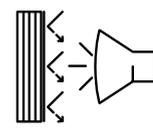

Fire protection

Water resistant

Thermal insulation

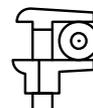

Acoustic insulation

Long lifetime

Sandwich technology

Tolerance

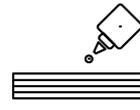

Easy repair

Optionally painted

Welding free

Easy glueing

Recyclable

Phenolic resin free

Customization

TSI LOC&PAS
TSI PRM
EN 12663 / GMRT 2100

REACH regulation
UNIFE
EN 45545 / DIN 6701
