

# BIOforte GmbH

## More than 20 Years' Experience Making the World Cleaner and Hopefully a Bit Safer

**B**IOforte's passion and commitment are clean surfaces in public areas and representative rolling stock.

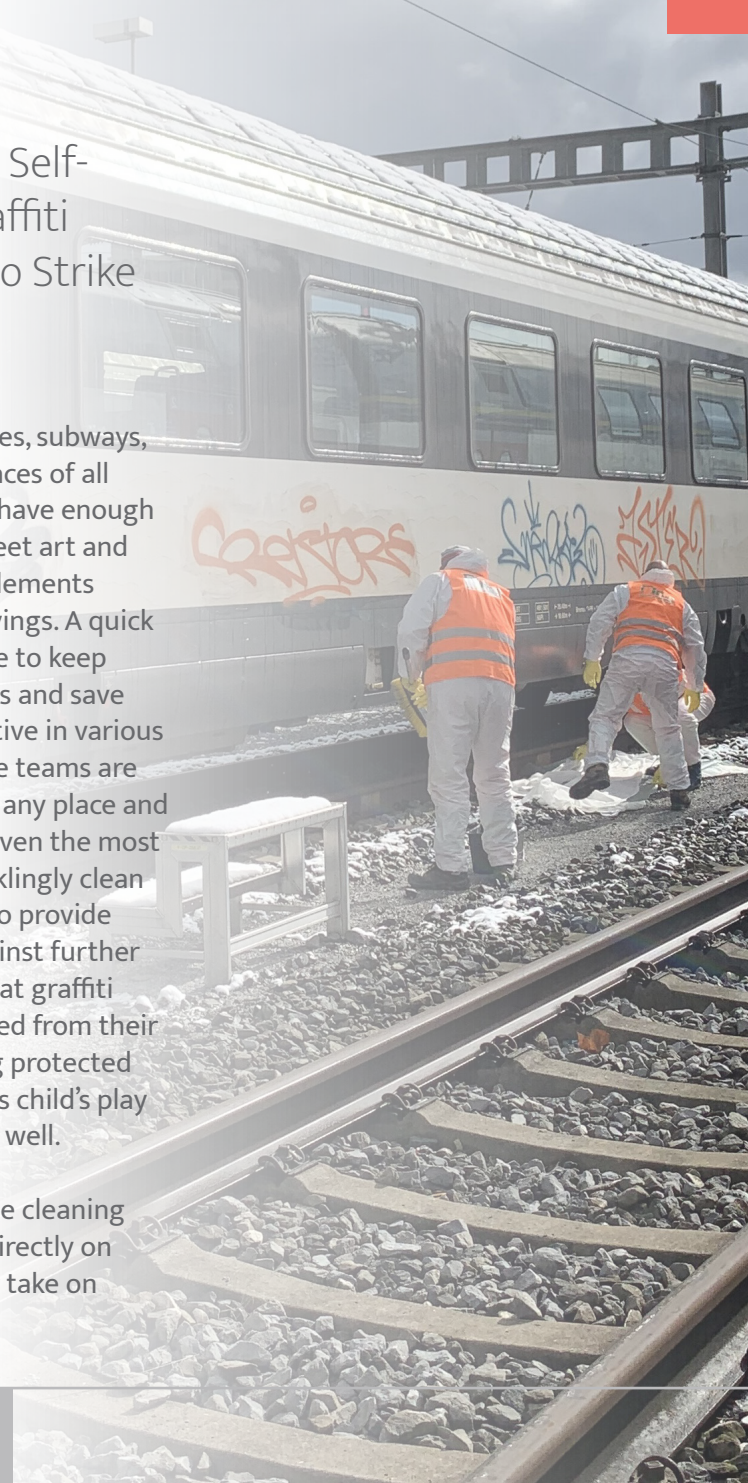

**Benefit now from our Quality Management System approved by ISO 9001 and ISO 14001.**

The dedicated team around the father-daughter pairing of Udo and Anja Mannartz has just received official approval for the certification for ISO 9001 and ISO 14001. Continuously improving their skills and getting even more professional is just as important to them as their daily commitment to their customers to solve every surface problem in the outdoor area. BIOforte operates in Switzerland and Germany as well as in collaboration with other partners in several countries throughout Europe. BIOforte spares no effort to provide products and services that meet customer and regulatory requirements and to demonstrate continuous improvement.

### How Annoying! Self-Proclaimed 'Graffiti Artists' Prefer to Strike at Night...

They deface rail vehicles, subways, facades and public spaces of all kinds. Not all of them have enough talent for valuable street art and even the smallest defilements encourage more sprayings. A quick clean-up is crucial here to keep away possible copycats and save unnecessary costs. Active in various countries, the BIOforte teams are on the spot quickly, at any place and at any time, to make even the most delicate surfaces sparkingly clean again and, if desired, to provide lasting protection against further contamination. Not that graffiti artists can be prevented from their activities, but cleaning protected surfaces then becomes child's play for your employees as well.

At BIOforte, we provide cleaning services reliably and directly on site with our teams or take on

protective assignments so that future costs and efforts are reduced for you. If you have your own cleaning teams, but still lack the expertise for efficient cleaning or biodegradable cleaning agents that ensure clean surfaces quickly and sustainably, then trust our tricks of the trade. We are happy to train your employees and pass on our knowledge – to make the world a little cleaner and maybe even a touch safer.

## Clean Also Means Safer in Many Cases

How do you feel when you walk through dark, smeared alleys or subways? Imagine the walls first neglected and defaced and then clean and well-maintained again. Hand on heart, clean and presentable facades, walls and vehicles stand for the fact that someone cares – this conveys safety to us, our employees and our loved ones on the way to work, school and home.

It is also certain that the cleaning of graffiti and the targeted freshening up of facades affected by the weather contributes a lot to your good reputation as a company.

**Moss infestation on north facades? Scratched expensive glass? Washed-out paint or lacquer? Does chewing gum on pavements stick like glue?**

BIOforte is an expert in all these cases. The removal of chewing gum (you will be amazed!) has made many an infrastructure manager almost despair. Expertise is needed to ensure that even porous surfaces can be kept sparklingly clean again.

After all, facades are the representative business card of any building or structural facility. BIOforte removes unsightly infestations of microorganisms on all kinds of materials such as masonry, concrete or eternit, incl. protection against new infestations (5-year guarantee). The results for the removal of chalking from metal facades are also convincing, including paint refreshment and graffiti protection.

Did you know that even expensive glass surfaces with deep scratches can still be saved? No replacement of the panes is necessary when the gentle BIOforte glass repair process is used – invisibility guaranteed.

### BIOforte offers you the following advantages:

- Specialist services in any location at a time that suits you
- Rolling stock is soon ready for use again
- Use of non-toxic, high-performing removal and protection products tried and tested in a wide variety of situations and approved by major railway companies
- Training, advice and sales of professional products and equipment
- 20 years of experience across Europe with an extensive list of references

*Best results on any surface*

*Annoying graffiti*
