

BeFREE 10 (BF 10)

10.4" Touchcomputer with Integrated Intercom and Projected Capacitive Touch Panel

In addition to existing resistive touch panel technology we are introducing Projected Capacitive (PCAP) technology on our BF10 dispatcher console.

The industrial grade PCAP we are using offers following features:

- Immune to droplets of fluid
- Possibility to operate with medical gloves
- Robust (two glass sheets laminated together)
- High transparency and clear visibility
- Excellent stability and immunity to electrostatic disturbances

Technical details:

- 5 finger multi-touch
- Light transmission 89% typical
- Accuracy ± 3.0 mm
- Lifetime 50×10^6 touches (with finger)
- Supports water detection, glove operation and pen use
- Windows and Linux OS supported

Ordering code: BF10-JD2-**P**x0-C15-C25

Other BF models will follow starting with BF22.
