Protect Your Reputation! Rely on BIOforte for the Most Convincing Concept against Graffiti

**G**raffiti on rolling stock, on buildings and in public spaces can not only be annoying, but also cause high, unnecessary costs.

BIOforte has 20 years of international experience and offers you convincing solutions. Get one step ahead of graffiti 'artists'!

It's an ongoing cat-and-mouse game that rail companies face every day. Trains, facades, buildings and underpasses cannot simply be locked away to be protected from being vandalised!

For years, BIOforte has therefore successfully relied on holistic concepts with the latest generation of environmentally friendly, rapidly deployable, sustainable and naturally strong cleaning and protection work and products.

Protection and prevention help to save costs and effort. Comprehensive anti-graffiti protection of a wide variety of surfaces and buildings worthy of preservation is the best recipe for staying one step ahead of the graffiti 'artists', or for reacting without great effort when they do strike.

Choose a Strategy of Quick Removal and Effective Reliable Protection

Reacting quickly to smears is the best strategy for giving troublesome copycats no chance. For delicate materials and surfaces that are not yet protected, it is worth letting experts do the work so as not to leave damage behind with the wrong cleaning agents. Protected surfaces can be quickly and easily restored to their former glory at any time by your own

employees using the appropriate BIOforte cleaning products.

## Protect Your Reputation with Prestigious Appearances across the Board

If graffiti contamination slips out of your control, it will quickly have a bad impact on your reputation. Smudged rolling stock and dirty driveways and pedestrian areas have also been shown to have a major impact on whether customers feel safe. Customer satisfaction and trust are too valuable for any business to be affected by graffiti and other soiling.

Customer expectations are high and want to be met, especially when it comes to safety and feeling good. Cleanliness radiates safety! Do not compromise on this.

## Benefit from Our Quality Management System Approved by ISO 9001 and ISO 14001

BIOforte spares no effort to provide products and services that meet customer and regulatory

requirements and to demonstrate continuous improvement. Processes and products are constantly controlled and further improved thanks to ISO 9001, in order to meet customer requirements as well as other requirements for product or service quality, and ISO 14001, in order to also maintain all important environmental aspects at the best level throughout BIOforte's range of products and services.

## Benefit from Long Experience, Train Employees and Act Quickly

BIOforte has developed its partnership offer, especially for companies around rail transport, over the years on an international level and broad experience customer-specific. Individual solutions that you need for your rolling stock, for your buildings or for the public space are their great strengths. Internationally renowned companies such as SBB Swiss Federal Railways, DB German Railways, other state railroads and various private railroad companies trust in BIOforte. Save money now by relying on professionals.

## BIOforte Products for Your Own Use

Are your employees already versed in graffiti cleaning? Then rely on environmentally friendly and biodegradable products of the latest generation. To protect employees, materials and the environment, and without compromising on the proper treatment of even delicate surfaces, it pays to rely on the best, VOC-free products. BIOforte's wide range of products is developed exclusively and with experienced experts and is regularly checked by partner railway companies. You too can rely on BIOforte cleaning and protection products for rail vehicles as well as facades, buildings and surfaces of all kinds.
