

- MODERNITY
- COMFORT
- SECURITY

A company that is developing and achieving significant success as a manufacturer of specialized seating systems for drivers, tram drivers, train drivers, and captains. We provide design, production, assembly, and service for a wide range of seats dedicated to various transport sectors for:

- Railway
- Marine
- Automotive
- Aviation
- Agriculture
- Construction and the steel industry
- Office

MK Seats can adapt to customer needs on multiple levels and provide consistent solutions.

Our vision is driven by innovation, user comfort and security, and the use of modern digital technologies. It's the perfect path to take in these days where technology plays an increasingly important role in all areas of industry.

Modern digital technologies are used in the design, production, and customer service processes to emphasize the quality, safety, and innovation of MK Seats' products. The company has numerous certificates, such as:

TSI LOC&PAS ISO 9001:2015 PN-EN 45545-2 HL1 HL2, HL3

EC Declarations of Conformity, confirming compliance with stringent quality and safety standards. The implementation of IRIS certification is another step towards maintaining the quality and compliance of MK Seats products.

The goal of MK Seats is to continuously improve processes, ensure the comfort and safety of users, and expand the scope of its design activities by introducing innovative products and services to the market. To better understand the needs and expectations of customers, the company prioritizes building positive relationships, both internally and with business partners.
