Seating Solutions for Mass Transit

North American Seating Solutions

SEATING SOLUTIONS

GET IN TOUCH WITH COMFORT

Kiel Americas, as a part of the Kiel Group, has been providing seating solutions for the North American mass transportation industry since 2009.

Kiel Americas employs approximately 150 employees and has full R&D and manufacturing capabilities at its facility located in Bellwood, Illinois. However, we are also part of a global network, with additional production facilities and technical resources in Germany, Poland, Turkey and Macedonia.

Kiel Americas offers a wide range of passenger rail seating systems for local, regional and intercity transport. In the best Kiel tradition, all our seats combine quality, individuality, cost-effectiveness and safety with innovative ideas and attractive, lightweight designs. With a commitment to ergonomic design, durability and space optimisation, we're not just seating passengers; we're elevating their experience.

With safety always at the forefront of our designs, Kiel engineers have experience working and conducting crash testing in many different countries. Because they

incorporate standards from a variety of safety boards around the world, Kiel passenger seats have achieved high quality standards.

Kiel Americas utilises modular, recyclable construction systems, aiming to conserve resources and provide as many environmentally friendly options as possible. Most importantly, a Kiel seat can be renovated after 10 years of use by simply replacing the fabric and foam.

When it comes to designing and producing the optimal seat for a given application, Kiel Americas stands behind the slogan 'It's up to you'. At the end of the day, it is a question of what a specific country or a specific customer wants. For instance, this can mean a steel structure with steel components, or a composite material base. It is not only the travellers who have specific requirements for seating: Kiel's customers – the manufacturers of passenger intercity rail cars, commuter rail vehicles and light rail vehicles – expect seats that are increasingly economical, robust and lightweight. Furthermore, Kiel's customers expect seating that covers all eventualities, from basic to luxury features, depending on the intended purpose. Simply put, it's up to you.®
