## DiLoc®|OnBoard: Smart Passenger Information for Your Vehicles

### Proven. Future-Ready.

DiLoc®| OnBoard is a 100% web-based, modular system designed for seamless integration. Many features can be activated with just a few simple settings and are ready to use immediately.

DiLoc®| OnBoard connects effortlessly with various onboard vehicle platforms and a wide range of software solutions - optimally paired with our own DiLoc®|Motion.

### Reliable Hardware Solutions

Keep your passengers informed with real-time audio and visual updates, even in unexpected situations. Best of all, the system runs automatically - no extra staff required.

### Important DiLoc®|OnBoard features

- **Updates in Real-Time:** Keep schedules accurate and systems reliable.
- **High Accessibility:** Deliver clear information for all passengers, including those with disabilities.
- **Live Connection Updates:** Displays live transfer options and delay notifications.
- **System Diagnosis:** System health is monitored for smooth operation and fast troubleshooting.
- **Web-Based Management:** Access and control your system remotely from anywhere.

### Benefits for Your Business When You Choose Us

- **Experienced Provider:** You get the best results, whether you're building new trains, modernizing existing ones, or retrofitting older models.
- **Cost Reduction:** Use manufacturer-independent hardware, including existing devices.
- **Lower Maintenance Effort:** Maintenance and updates are done over the air, reducing time and labor costs.
- **System Compatibility:** Our open architecture and encrypted communication ensure seamless integration with other systems.

### Benefits for Your Passengers

- **Real-Time Information:** Get live updates on delays, transfers, schedule changes, and disruptions.
- **Enhanced Travel Experience:** Enjoy real-time displays and accessibility features like **Auracast™** for a smoother journey.
- **Eco-friendliness & Comfort:** Paperless updates and better passenger flow.
